Work Experience

Shahid Mar, 2022 — Present

Assistant Data and Analytics Manager *Apr, 2024 — Present*

Leading strategic data analytics initiatives to optimize ROI and streamline business processes using advanced BI tools and methodologies.

- Spearheading the integration of new data sources (Google Ad Manager, Sprinklr, Salesforce) and expanding analytics capabilities to meet evolving business needs.
- Designed and launched enhanced data visualization dashboards using Power BI, improving decision-making for senior management.
- Managed cross-functional collaboration with teams (marketing, finance, operations) to standardize KPIs and reporting across platforms.
- Implemented data quality and governance standards, ensuring data integrity and consistency across systems.
- Mentored and trained teams on DAX, SQL, and Power BI, fostering a culture of continuous learning and improving data literacy across the organization.

Senior BI Analyst *Mar, 2022 — Mar,2024*

Supported business teams in tracking and analyzing KPIs for subscribers and content performance.

- Developed and automated business reports and dashboards in Power BI and Tableau, aligning KPIs with business objectives.
- Collaborated with business stakeholders to define and document KPIs
- Worked on large datasets and aggregated subscriber data from VOD, SVOD, and App platforms using Redshift and Databricks
- Led data restructuring and normalization processes using SQL and worked closely with data engineers to define data modeling requirements.
- Mentored junior BI team members on Power BI, SQL, and DAX to enhance analytical capabilities.

Beinex Jan, 2019 — Mar, 2022

Senior Consultant – Analytics *Jan, 2021 — Mar,2022*

Managed and delivered end-to-end analytics solutions for clients across various industries, leveraging advanced BI tools.

- Led project management and resource allocation, utilizing Microsoft Project and Jira to ensure timely delivery.
- Designed and conducted business analyses using Tableau, Power BI, SQL, and Alteryx to solve business problems and provide actionable insights.
- Provided client-facing support for business intelligence tools and analytics processes, ensuring

alignment with business goals.

- Trained business analysts and stakeholders on Tableau, Power BI, and SQL to maximize tool adoption and use.

Business Intelligence Consultant *Jan, 2019 — Dec,2020*

Led the implementation of BI strategies, leveraging a range of BI tools and data technologies to enhance client decision-making.

- Engineered Tableau dashboards and data visualizations, delivering key insights into KPI performance across business departments.
- Managed data extraction, transformation, and loading (ETL) processes using SSIS, Alteryx, Tableau Prep and SQL Server to ensure clean, usable datasets.
- Delivered product demonstrations and presales support using Tableau and Power BI, ensuring alignment with client business processes.
- Provided training for end-users and senior management on Tableau and SQL, promoting BI tool adoption and best practices.

Al-Futtaim Technologies May, 2018 — Jan, 2019

Business Intelligence Consultant

Presales and implementation of data visualization, ETL, and data warehousing solutions for clients.

- Designed and implemented Tableau visualizations based on client KPIs.
- Managed ETL processes using ALteryx for data extraction and transformation.
- Led presales activities and product evaluations, using Tableau to demonstrate the value of BI solutions.
- Created secure, interactive dashboards with Tableau, ensuring row-level security and user-specific access controls.

Scan Technology L.L.C Oct, 2016 — Apr, 2018

Business Intelligence Consultant

Implemented end-to-end BI solutions, leveraging advanced tools for data visualization and analytics.

- Led the implementation of Tableau, Alteryx, and SQL solutions for business clients.
- Designed and delivered sales, financial, and performance dashboards using Tableau for near real-time data insights.
- Automated dashboards for performance tracking and trend analysis, using Tableau and Alteryx to provide daily, weekly, and monthly reports.
- Conducted onsite training for clients on Tableau and Alteryx, helping them optimize their BI solutions.

Central Motors & Equipment – Bosch Feb, 2016 — July, 2016

Intern

Contributed to sales performance analysis and market strategy development through dashboard design and reporting.

- Designed and developed sales dashboards for weekly, monthly, quarterly, and yearly tracking.
- Analyzed weekly turnover reports, identifying areas for improvement and optimization.
- Conducted market analysis and formulated distribution strategies for power tools.
- Provided technical sales support for clients, driving new customer acquisition and retention.

Steinweg Sharaf June, 2014 — Aug, 2014
Summer Intern

Supported process mapping, documentation, and compliance efforts for operational excellence.

- Mapped service processes, identifying and correcting errors to streamline operations.
- Documented airway bills and cross-checked them with shipping manifests for accuracy.
- Assisted in the verification of QHSE policies for ISO certification compliance.

Education

Birla Institute of Technology and Science – Dubai Sep, 2012 — July, 2016
Engineering (B.E. Hons)

The Indian High School – Dubai July, 2012
12th grade Board Examination (CBSE) – 91%

The Indian High School – Dubai June, 2010
10th grade Board Examination (CBSE) – 92%

Certifications

Azure Data Fundamentals 2022

Predictive Analytics for Business Nanodegree (Udacity) 2020

Tableau Certified Associate Consultant 2020

Alteryx Designer Core 2020

Tableau Desktop Specialist 2019

Tableau Desktop Qualified Associate 2018

Tableau Partner Sales Accreditation 2018

IOSH Managing Safely 2015

Skills

- **BI:** Power BI, Tableau, Qlik Sense, QlikView
- **Warehousing & ETL:** Databricks, Alteryx, SQL Server, SSIS, SSAS
- **Programming & Scripting:** SQL, DAX, Python
- **Project Management:** Microsoft Project, Jira
- **Cloud Platforms:** Microsoft Azure, AWS

Key Strengths

- Data Analysis & Predictive Modeling
- Advance Data Visualization
- Data-Driven Decision-Making & Strategy
- ETL & Automated Data Pipelines

Projects

Power BI Workshops for Data Literacy and Self-Service Analytics *Aug*, 2014— *Present*

Scope: Organize workshops for cross-departmental teams to enhance data literacy and self-service analytics using Power BI, enabling independent report analysis and reducing reliance on centralized analytics.

Achievements:

- Achieved a 40% increase in report utilization, streamlining decision-making processes across departments.
- Reduced dependency on analytics teams by 25%, freeing up resources for higher-priority tasks.

Semantic Layer Creation in SSAS *Feb*, 2024— *Sep, 2024*

Scope: Developed a Semantic Layer in SSAS, consolidating key Shahid performance metrics for Power BI and advanced analytics.

Achievements:

- Achieved a 50% improvement in query performance for reports spanning millions of rows by optimizing DAX calculations and data relationships.
- Unified over 100+ KPIs into a single Semantic Layer, enabling stakeholders to access consistent and reliable metrics.
- Reduced dependency on manual data reconciliation efforts, saving 15 hours per week across analytics teams.

Google Ad Manager (GAM) Integration *Apr*, 2023— *Aug, 2023*

Scope: Integrated GAM data into the Shahid Data Model and Semantic Layer, enabling ad inventory tracking and impressions analysis tied to content revenue on AVOD.

Achievements:

- Reduced data processing times by 25% with a streamlined ETL process for GAM data ingestion.
- Ensured compliance with GAM API usage limits while automating recurring data pulls for seamless integration.
- Developed near real-time dashboards that empowered the teams to make faster decisions.

BI Architecture Migration from Tableau to Power BI *Jan*, 2023— *May, 2023*

Scope: Led the end-to-end migration of BI architecture from Tableau to Power BI, streamlining departmental reporting workflows.

Achievements:

- Reduced report maintenance costs by 35% through automation and implementation of a centralized governance model.
- Increased report adoption by 40% among business users by tailoring dashboards to specific departmental KPIs.

- Improved cross-departmental collaboration by creating a unified data ecosystem, eliminating siloed reporting.

Shahid Data Model *May*, 2022— *Dec, 2022*

Scope: Designed and implemented a multi-layered data model (Silver and Gold Layers) using Amazon S3 for raw data ingestion. This model consolidated metrics like subscriber base movement, user sessions and engagement, title performance, and ad-related data.

Achievements:

- Accelerated data retrieval speeds by 30% by standardizing data structures, optimizing table relationships, and implementing indexing strategies.
- Enabled cross-functional teams to access curated data with 99% accuracy, boosting decision-making efficiency.
- Scaled the data model to handle a 5x increase in data volume, ensuring zero downtime during high-traffic periods.

The Rulers Court *Feb*, 2019— *Present*

Scope: Led business intelligence projects by developing dashboards, optimizing BI architecture, and providing data-driven strategies for various internal departments.

Achievements:

- Reduced manual tasks by 40% by implementing SSIS for ETL, streamlining data flow processes.
- Developed comprehensive dashboards for HR, Payroll, Finance, and Supply Chain teams, improving decision-making efficiency by 25%.
- Enhanced BI architecture, increasing system reliability and report generation speed by 30%.
- Provided training for end-users on Tableau, improving user adoption and self-service analytics by 20%.
- Successfully led all in-house BI projects, delivering solutions on time and aligning with business objectives.

Al-Futtaim Group Enterprise IT Team *May*, 2018— *Dec*, 2018

Scope: Implemented Tableau BI across multiple departments, consolidating data from legacy systems and creating new dashboards to aid in business decision-making.

Achievements:

- Successfully consolidated data from multiple systems, improving data accessibility by 30%.
- Converted legacy reports into dynamic Tableau visualizations, reducing report generation time by 50%.
- Created customized dashboards for HR, Mall Management, and Finance teams, enabling faster decision-making.
- Improved data visualization and accuracy, reducing manual reporting errors by 50%.
- Streamlined reporting processes, enabling real-time data analysis for key business areas.

QuickBooks *Jan, 2018—Apr, 2018*

Scope: Developed a Qlik Sense Executive App for QuickBooks, focusing on data modeling, performance optimization, and creating key business metrics.

Achievements:

- Implemented a star schema data model using Qlik's load editor, improving data query performance by 30%.
- Created QVD extracts to optimize data processing and reduce load times by 40%.
- Mapped extracted tables to generate key measures and dimensions, improving the app's overall functionality.

Scan Payroll Oct, 2017 — Jan, 2018

Scope: Designed Qlik Sense dashboards for Scan Payroll to track employee leave and salary data efficiently.

Achievements:

- Automated and streamlined payroll reporting, reducing reporting cycle time by 25%.
- Optimized Qlik data models, increasing dashboard performance by 20%.

Adani Enterprises May, 2017 — Dec, 2017

Scope: Designed and developed data models and dashboards using Alteryx and Tableau to improve financial and sales reporting processes.

Achievements:

- Successfully consolidated data from multiple systems, improving data accessibility by 30%.
- Implemented data modeling and integration using Alteryx, improving data flow efficiency by 30%.
- Designed and deployed key financial and sales dashboards, increasing data accessibility for decision-makers by 20%.
- Optimized SQL queries and data models, improving report generation time by 25%.
- Created KPIs and calculated metrics to measure business performance, enabling more accurate forecasting.
- Successfully converted static reports to dynamic Tableau dashboards, improving visualization quality.

Jaguar & Land rover Feb, 2017 — May, 2017

Scope: Created and deployed advanced Tableau dashboards to track performance KPIs and deliver actionable business insights.

Achievements:

- Developed interactive dashboards in Tableau to visualize key performance indicators (KPIs) for the sales and service teams, improving data accessibility and decision-making speed by 30%.
- Implemented drill-down features that allowed users to explore granular data, enhancing insights into customer behavior and vehicle performance.
- Reduced manual reporting efforts by 20% by automating the data extraction and visualization processes.

Mirdif Private School Dec, 2016— Jan, 2017

Scope: Developed Tableau dashboards to visualize and analyze academic data, improving reporting capabilities for the KHDA (Knowledge and Human Development Authority).

Achievements:

- Designed and developed Tableau dashboards to visualize student academic data, improving report accuracy by 20%.
- Standardized data structures across departments, ensuring consistency in reporting.
- Established a robust data structure for academic data analysis, supporting future reporting needs.
